Ans 1

Q2 This is a healthy platter which includes:

1. Bread
2. Curd
3. panner
4. onion
5. Fried rice

And a person should keep a healthy diet but not a heavy diet, a light one which should include:

1. Bread
2. Vegetables
3. Onion
4. Curd/panner

b.

The nutrient which is broken down in the mouth and the digestive juices which act on it to break it into its simplest to help indigestion is: Bolus.

Ans 2

a.

b) Answer for pic 1: ~~Dispersal~~ ~~know~~ - ~~Explosion~~

Answer for pic 2: Dispersal know: Wind ✓

Ans 2

a) The person in the picture is floating without any floating device because of so much density and this picture shows that the sea he is in is called the dead sea and in that sea there is so much salt so there is lots and lots of density so that the person can float. ✓

b) The items mentioned in the question float in hot oil because when there is something hot then its density increases so the items are pushed to float due to upthrust and the items ~~sank~~ ~~when~~ ~~there~~ was normal oil because it had less density. ✓

Ans 4

a)

<u>miscible</u>	<u>immiscible</u>
1. It is <u>soluble</u> .	1. it is not soluble.
2. It can be mixed with water.	2. It can't be mixed with water.
3. eg:- orange + water = orange juice. ✓	3. eg:- oil and water = nothing... ✓
